## Digital EGT Gauge

### Specifications

- Supply voltage 10-16[v]
- 390[F] to 2500[F]
- 3 digit Blue LED display
- 10[F] resolution
- Red warning light will be light when  $EGT < 600[F]$  or  $EGT > 1600[F]$

### Installation

During installation do not insert the cable harness into the gauge, once your wiring is complete then insert the cable harness into the gauge. Automotive upholstery is a fantastic static electricity generator, inserting the cable harness only after wiring is complete will greatly reduce the chance of damage to the gauge by static electricity.

Wire Color	Connects to	Note
Red	Switched 12[v]	Usually wired after ignition switch
Black	Ground	
Blue	Blue terminal on EGT Probe	
Pink	Pink terminal on EGT Probe
